

Quintessential Latin Extended-A

Range: U+F2B00-U+F2BFF

Character code tables and names

252 assigned characters. This file presents the Quintessential Latin 0.220 private-use allocation, followed by a numeric list of character names. Charts contain eight hexadecimal columns and sixteen rows per sheet.

Status

Draft private-use allocation for the Under-ConScript Unicode Registry (UCSUR). These characters are not part of the Unicode Standard. Publication of this document does not indicate registry submission or acceptance.

Reading the charts

Combine a column heading with a row digit to find a character. The full hexadecimal code appears below each reference glyph. Shaded cells are unallocated. Names list entries are ordered by ascending code point and read down the left column, then the right.

Reference font

Quintessential Serif 0.220, Roman, weight 400. All 252 assignments in this block are available in Roman; 36 also have native Italic outlines. Italic is a font posture, not a separate character. The website shows current posture availability and provides weight controls.

Authorship and terms

Script and original publication: Josh Hufford. Original code and documentation are licensed under MIT. Quintessential Serif and the STIX Two Text interface font are distributed under the SIL Open Font License 1.1. Font notices accompany the downloads.
