

Quintessential Latin

Range: F2A00-F2ABF

This file contains the character code tables and list of character names for Quintessential Latin, Version 0.250. The block contains 192 assigned characters.

Status

Draft private-use allocation for the Under-ConScript Unicode Registry (UCSUR). These characters are not part of the Unicode Standard. Publication of this document does not indicate registry submission or acceptance.

Character code tables

The tables contain up to sixteen hexadecimal columns and sixteen rows per page. Each chart stops at its block boundary. Combine a column heading with a row digit to find a character; its full hexadecimal code also appears below the reference glyph. A thin outside edge indicates that the table continues on another page.

Character names

The names list follows the tables in ascending code point order, reading down the left column and then the right. Family subheadings organize related characters. Names and code points identify characters independently of their representative glyphs.

Fonts and representative glyphs

The reference font is Quintessential Serif 0.250, Roman, weight 400. All 192 assignments in this block have Roman outlines; 192 also have native Italic outlines. Italic is a font posture, not a separate character. Glyphs are representative forms; their appearance may vary with font posture and weight.

Authorship and terms

Script and original publication: Josh Hufford. Original code and documentation are licensed under MIT. Quintessential Serif and the STIX Two Text interface font are distributed under the SIL Open Font License 1.1. Font notices accompany the downloads.

Chart text is set in Source Sans 3, distributed under the SIL Open Font License 1.1.
